This catalogue introduces the best products of nutraceutical solutions classified by animal species, functions and forms; the index of products helps for an easy search.
Introduction

Tecnología & Vitaminas S.L. is specialised in animal nutrition industry worldwide. Years of experience guarantee our knowledge in healthy animal feeding.

Our mission is to be our customer’s best partner with quality, innovation and sustainability of our services and products.

Thinking and building together for a better future.
How to use this Catalogue

This catalogue describes each product in different sections. The product category for each section is found by colour code, icons and name.

APLOMOTEC PLUS
In fast-growing breeds to prevent abnormalities in the hoof state or any other symptoms associated with biotin deficiency.

Composition: biotin, zinc, manganese and copper of organic origin.

- Dose: 0.1%
- Expiry date: 12 months
- Packaging: 25Kg

Colour indicates the product name for D section.

VIOLET
Colour indicates animal species for A section.

GREEN
Colour indicates function of product for B section.

BLUE
Colour indicates product form for C section.
How to use this Catalogue

The catalogue image presented in this edition is an optimazed picture. Further you can find the equivalence between real images of the products and their catalogue images.

- Powder ..................................................36

SECTION_ Products list A - Z
- Index .....................................................42
HISTOVIT

Included in the feed, is a specific preventive treatment for histomoniasis: a parasitic disease of birds.

Composition: plants and essential oils with antiparasitic, antiseptic and stimulant properties.

- **Dose:** 0.085%
- **Expiry date:** 12 months
- **Packaging:** 20Kg

ACITEC A-GR

Microencapsulated essential oils and acids for poultry. It obtains a constant and safe acidification through the complete intestinal tract. It avoids hyperacidification and pathogenic bacteria.

Composition: fumaric acid, malic acid and essential oils with antibacterial and synergic properties.

- **Dose:** 0.02–0.075 %
- **Expiry date:** 18 months
- **Packaging:** 25Kg

TECNOVIT MIN Aq.

Prevents metabolic disorders due to its balanced combination of highly available electrolytes and trace elements. It prevents skeletal abnormalities and negative effects of heat stress. It strengthens the eggshell.

Composition: water, calcium chloride, magnesium chloride, sodium chloride and trace elements.

- **Dose:** 1L/1000L of drinking water
- **Expiry date:** 24 months
- **Packaging:** 5L, 200L
Species: SWINE

APLOMOTEC PLUS

In fast-growing breeds to prevent abnormalities in the hoof state or any other symptoms associated with biotin deficiency.

Composition: biotin, zinc, manganese and copper of organic origin.

- Dose: 0.1%
- Expiry date: 12 months
- Packaging: 25Kg

SPLAY TEC

Supplement for gestating sows to use in farms with high incidence of splay leg in piglets.

Composition: vitamin E, selenium and other minerals.

- Dose: 0.2%
- Expiry date: 12 months
- Packaging: 25Kg

NVP003

For sows with higher requirements of vitamins to improve prolific parameters and fertility in reproduction periods.

Composition: vitamin E, folic acid, biotin.

- Dose: 0.1%
- Expiry date: 12 months
- Packaging: 5Kg
ACITEC C-GR

Microencapsulated essential oils and acids for pigs. It obtains a constant and safe acidification through the complete intestinal tract. It avoids hyperacidification.

Composition: fumaric acid, sodium formate and essential oils with antibacterial properties.

- **Dose:** 0.025-0.15%
- **Expiry date:** 18 months
- **Packaging:** 25Kg

BUTYTEC PLUS

**Butytec Plus** helps the animals to grow Healthy and Strong. The Benefits of butyric acid with the advantages of a microencapsulated product.

Special formula that contributes to the good status of the intestinal tract and provides a better absorption of the nutrients.
Species: Ruminants

**ReproLac Ruminantes**
Reinforces the health of ruminants during high production periods, having an action in rumen, liver, intestine and also in reproductive system.

Composition: yeast, amino acids, vitamins and minerals in organic form.

- **Dose:** 1%
- **Expiry date:** 12 months
- **Packaging:** 20Kg

---

**Glukose**
Dietetic product used to reduce the risk of ketosis in dairy ruminants.

Composition: based on the ingredients that provide energy from glycogen.

- **Dose:** sheep/goats = 40g/d
- **Cows:** 250-300g/d
- **Expiry date:** 12 months
- **Packaging:** 5Kg, 20Kg

---

**Hydratec**
Dietetic supplement for rehydration. It is recommended for ruminants in prevention and treatment of diarrheal enteric disorders and/or recovery.

Composition: Sucrose, skimmed milk powder, whey powder, sodium chloride, palm oil, wheat flour, potassium chloride, potassium sulphate, yeast their similar products and vitamins.

- **Dose:** 180g/2L of drinking water
- **Expiry date:** 12 months
- **Packaging:** 180g
CALCIOVIT
Supplementary diet feed for dairy cows aimed at reducing the risk of milk fever.

Composition: highly available calcium salt, full contribution of electrolytes, plant extract stimulating the appetite having choleretic, chologogue effects.

- Dose: 1 bag of 500g/25L of water
- Expiry date: 12 months
- Packaging: 500g

HEPATOVIT
Reduces the risk of fatty liver syndrome. It’s used in fatty cows in early lactation, in highly potential cows at the peak of lactation and early dry period for all livestock. It helps to maintain a good milk production.

Composition: vitamin A, choline, betaine, trace elements and plant extract having effects on liver cells regeneration.

- Dose: Sheep/Goats = 20 g/d
- Cows = 100 g/d
- Expiry date: 12 months
- Packaging: 500g

VITAMIC
Microencapsulated lipotropic factors for ruminants with liver dysfunctions. The microencapsulation provides protection against rumen degradation allowing the active substances to remain intact getting into intestine.

Composition: choline, methionin, nicotinic a, vitamin E, folic a.

- Dose: Dairy Sheep/Goats = 8 g/d
- Dairy Cows = 50 g/d
- Expiry date: 12 months
- Packaging: 5kg, 25kg

ALITEC
Allows a good start up of young animals, contributing to maintain high levels of growth in the fatteners of lambs, kids and calves.

Composition: microencapsulated essential oils with extracts of plants and spices.

- Dose: 0.2%
- Expiry date: 12 months
- Packaging: 1Kg, 5Kg, 25Kg
CALCIOVIT
Highly bioavailable calcium source

Dietary supplement for dairy cows aimed at reducing the risk of hypocalcemia.

Supportive treatment of other diseases:
CALCIOVIT favours the recovery of diseases such as: Indigestions, mastitis, febrile processes, etc.
Species: GENERAL

HYDROCAP-AA
Effective alternative to the use of growth promoters, avoiding the destruction of the saprophytic flora. It acidifies, having slow releasing effect all along the intestinal tract.

Composition: medium chain fatty acids esterified with glycerol, pure distilled fatty acids from splitting palm oil, aromatics substances.

- **Dose:** 0.20-0.5 ml/L drinking water
- **Expiry date:** 18 months
- **Packaging:** 1L, 5L

HYDRACID-B
Liquid blend of Butyric acid glycerides and preservatives. It favours the feed intake and it controls the microbiota of the digestive tract, avoiding the development of pathogenic bacteria. Hydracid-B may be use for swine, poultry and rabbits of all ages.

Composition: monoglycerides, diglycerides and triglycerides of butyric acid, glycerine, propionic acid, ammonium propionate.

- **Dose:** 250 – 500 ml per 1000L of drinking water
- **Expiry date:** 12 months
- **Packaging:** 5L

HYDROCAP-R
Prevention of respiratory problems of both bacterial and viral origin, which are one of the most important causes of mortality and economical losses.

Composition: Its main compounds are essentials oils such as Eucalyptol and Thymol.

- **Dose:** 200ml/1000L drinking water
- **Expiry date:** 18 months
- **Packaging:** 1L
BUTYTEC

Microencapsulated formula, it contributes to maintain a good status of the intestinal tract and better absorption of the nutriments in all animal species.

Composition: butyric acid from its calcium salt, fumaric acid.

- Dose: 0.03 - 0.1%
- Expiry date: 18 months
- Packaging: 20Kg

BUTYTEC PLUS

Microencapsulated formula, to achieve a good status of the intestinal tract and better absorption of the nutriments for all animal species. It contains essential oils with synergic effects.

Composition: butyric acid from its calcium salt, fumaric acid and aromatic substances.

- Dose: 0.03 - 0.1%
- Expiry date: 18 months
- Packaging: 20Kg

PIDOVIT

Nutritional complex especially developed for pigs and poultry, due to its composition containing an analogue of P5C, it improves bone structure and the eggshell becomes harder.

Composition: Calcium Pidolate, 25-hydroxycholecalciferol, sepiolite and magnesium oxide.

- Dose: 0.15 - 0.2%
- Expiry date: 12 months
- Packaging: 25Kg

NOTES:
**PROHEPA**

For all animals species to prevent and treat liver dysfunctions, improving metabolism of fats and recovering liver overload.

**Composition:** choline, betaine, nicotinic ac., methionine, sorbitol and trace elements: Se and Zn in different forms.

- **Dose:** 0.4 - 0.6%
- **Expiry date:** 12 months
- **Packaging:** 20Kg

---

**PROHEPA LIQUIDO**

For all animals species to prevent and treat liver dysfunctions, improving metabolism of fats and recovering liver overload.

**Composition:** magnesium sulphate anhydrous, sorbitol, carnitine, choline chloride, methionine.

- **Dose:** 0.5 - 1 ml/L drinking water
- **Expiry date:** 12 months
- **Packaging:** 1L

---

**TECVIT AMINO**

Corrects health and productive risk situations in periods of imbalances and nutritional deficiencies. It also acts as a growth promoter and production enhancer.

**Composition:** Amino acid and vitamin complex.

- **Dose:** 0.5 - 1 ml/L drinking water
- **Expiry date:** 12 months
- **Packaging:** 1L, 5L

---

**NOTES:**

__________________________

__________________________

__________________________

__________________________
TECVIT AD3E
Specially designed for the treatment and prevention of deficiency processes that cause reproductive disorders or developmental defects.

Composition: Glycerol, vitamin A, vitamin D3, vitamin E.

- Dose: 0.25 - 1.5 ml/L drinking water
- Expiry date: 12 months
- Packaging: 1L, 5L

TECVIT Se
Recommended for normal reproductive function, improving fertility and oestrus. It prevents encephalomalacia in poultry and muscular dystrophy in lambs and calves. In pigs it prevents mulberry heart disease and dietary hepatoses.

Composition: vitamin E, sodium selenite, potassium sorbate, polyethylene glycol glyceryl ricinoleate.

- Dose: 1ml/L drinking water
- Expiry date: 12 months
- Packaging: 1L, 5L

TECVIT PLUS
Corrects health and productive risk situations in periods of imbalances and nutritional deficiencies. It also acts as a growth promoter and production enhancer.

Composition: vitamin A, D3, E, B1, B2, B6, B12, K3, panthenol, inositol, choline chloride.

- Dose: 0.5 - 2ml/L drinking water
- Expiry date: 12 months
- Packaging: 1L, 5L

NOTES:
**TECPRO 60V**

Concentrate of vegetable proteins for swine and poultry in any productive phase.

**Composition:** potato protein, soya protein concentrate, wheat gluten and roasted soybeans

- **Dose:** 3 – 12% depending on protein requirements
- **Expiry date:** 12 months
- **Packaging:** 30Kg

**ACITEC**

Provides a strong and safe acidification, compensating the gastric secretion in young animals. It improves digestive flora balance and it avoids pathogenic bacteria increasing performances.

**Composition:** citric acid, orthophosphoric acid, lactic acid, fumaric acid, propionic acid, acetic acid, silicic acid, sepiolite.

- **Dose:** 0.1 - 0.5%
- **Expiry date:** 12 months
- **Packaging:** 25Kg

**ACITEC LIQUIDO**

Decreases the water pH, having several effects: compensation of gastric secretion in young animals, improving digestive flora balance and increasing animal performances.

**Composition:** formic acid, ammonium formate, acetic acid, propionic acid, cupric sulphate, sodium chloride, sucrose.

- **Dose:** 0.5 - 2ml/1000L water
- **Expiry date:** 18 months
- **Packaging:** 5L, 25L, 1000L,

**NOTES:**

---

Phone. +34 977 816 919  exportacio@tecnovit.net  www.tecnovit.net
FITEC PLUS
Phytase produced by Aspergillus niger being effective in a large pH spectrum of the digestive tract.

Composition: 6-phytase EC 3.1.3.26, calcium carbonate.
- Dose: Layers = 0.06 - 0.08%
- Dose: Other species = 0.1 - 0.14%
- Expiry date: 12 months
- Packaging: 25Kg

PROFOR A
Preservative, antimicrobial and fungicide for raw materials and silage.

Composition: propionic acid, ammonium formate, formic acid.
- Dose: 0.05 - 0.2%
- Expiry date: 12 months
- Packaging: 25L

AMOPROP
Preservative, antimicrobial and fungicide for raw materials.

Composition: synergic blend of propionic acid and ammonium propionate.
- Dose: 0.005 - 0.2%
- Expiry date: 12 months
- Packaging: 25Kg

MICOCID
Mycotoxins are secondary metabolites produced by microscopic fungi which have negative effects in animal performances. Micocid is a binder of mycotoxins, it stimulates the immune system and has antioxidants effects.

Composition: clinoptilolite, bentonite, sepiolite, Silybum marianum seeds, manno-oligosaccharides (MOS) and B-glucans.
- Dose: 0.05 - 0.2%
- Expiry date: 12 months
- Packaging: 20Kg
PROFOR A
Preservative, antimicrobial and fungicide for raw materials and silage.
Composition: propionic acid, ammonium formate, formic acid.
- Dose: 0.05 - 0.2%
- Expiry date: 12 months
- Packaging: 25L

AMOPROP
Preservative, antimicrobial and fungicide for raw materials.
Composition: synergic blend of propionic acid and ammonium propionate.
- Dose: 0.005 - 0.2%
- Expiry date: 12 months
- Packaging: 25Kg

- Packaging: 20Kg
WE TRAP THE PROBLEM

MICOCID
Mineral complex for mycotoxin adsorption

High ability to adsorb mycotoxins.
An immune system stimulator.
An antioxidant and regenerative capacity of liver cells.
Function: METABOLIC REGULATORS

**HISTOVIT**

Included in the feed, is a specific preventive treatment for histomoniasis: a parasitic disease of birds.

Composition: plants and essential oils with antiparasitic, antiseptic and stimulant properties.

- **Dose:** 0.085%
- **Expiry date:** 12 months
- **Packaging:** 20Kg

**TECNOVIT MIN Aq.**

Prevents metabolic disorders due to its balanced combination of highly available electrolytes and trace elements. It prevents skeletal abnormalities and negative effects of heat stress. It strengthens the eggshell.

Composition: water, calcium chloride, magnesium chloride, sodium chloride and trace elements.

- **Dose:** 1L/1000L of drinking water
- **Expiry date:** 24 months
- **Packaging:** 5L, 200L
**GLUKOSE**

Dietetic product used to reduce the risk of ketosis in dairy ruminants.

**Composition:** based on the ingredients that provide energy from glycogen.

- **Dose:** sheep/goats = 40g/d
- **Cows:** 250-300g/d
- **Expiry date:** 12 months
- **Packaging:** 5Kg, 20Kg

Hydratec

Dietetic supplement for rehydration. It is recommended for ruminants in prevention and treatment of diarrheal enteric disorders and/or recovery.

**Composition:** Sucrose, skimmed milk powder, whey powder, sodium chloride, palm oil, wheat flour, potassium chloride, potassium sulphate, yeast their similar products and vitamins.

- **Dose:** 180g/2L of drinking water
- **Expiry date:** 12 months
- **Packaging:** 180g

Calciovit

Supplementary diet feed for dairy cows aimed at reducing the risk of milk fever.

**Composition:** highly available calcium salt, full contribution of electrolytes, plant extract stimulating the appetite having choleretic, cholangec effects.

- **Dose:** 1 bag of 500g/25L of water
- **Expiry date:** 12 months
- **Packaging:** 500g

Hepatovit

Reduces the risk of fatty liver syndrome. It’s used in fatty cows in early lactation, in highly potential cows at the peak of lactation and early dry period for all livestock. It helps to maintain a good milk production.

**Composition:** vitamin A, choline, betaine, trace elements and plant extract having effects on liver cells regeneration.

- **Dose:** Sheep/Goats = 20 g/d
- **Cows = 100 g/d
- **Expiry date:** 12 months
- **Packaging:** 500g
**HYDROCAP-R**

Prevention of respiratory problems of both bacterial and viral origin, which are one of the most important causes of mortality and economical losses.

**Composition:** Its main compounds are essentials oils such as Eucalyptol and Thymol.

- **Dose:** 200ml/1000L drinking water

**Composition:** Calcium Pidolate, 25-hydroxycholecalciferol, sepiloite and magnesium oxide.

- **Dose:** 0,15 - 0,2 %
- **Expiry date:** 12 months
- **Packaging:** 25Kg

**PROHEPA**

For all animals species to prevent and treat liver dysfunctions, improving metabolism of fats and recovering liver overload.

**Composition:** choline, betaine, nicotinic ac., methionine, sorbitol and trace elements: Se and Zn in different forms.

- **Dose:** 0,4 - 0,6%
- **Expiry date:** 12 months
- **Packaging:** 20Kg

**PROHEPA LIQUIDO**

For all animals species to prevent and treat liver dysfunctions, improving metabolism of fats and recovering liver overload.

**Composition:** magnesium sulphate anhydrous, sorbitol, carnitine, choline chloride, methionine.

- **Dose:** 0,5 - 1 ml/L drinking water
- **Expiry date:** 12 months
- **Packaging:** 1L
TECVIT AMINO
Corrects health and productive risk situations in periods of imbalances and nutritional deficiencies. It also acts as a growth promoter and production enhancer.

Composition: Amino acid and vitamin complex.

- **Dose:** 0.5 - 1 ml/L drinking water
- **Expiry date:** 12 months
- **Packaging:** 1L, 5L

ACITEC
Provides a strong and safe acidification, compensating the gastric secretion in young animals. It improves digestive flora balance and it avoids pathogenic bacteria increasing performances.

Composition: citric acid, orthophosphoric acid, lactic acid, fumaric acid, propionic acid, acetic acid, silicic acid, sepiolite.

- **Dose:** 0.1 - 0.5%
- **Expiry date:** 12 months
- **Packaging:** 25Kg

ACITEC LIQUIDO
Decreases the water pH, having several effects: compensation of gastric secretion in young animals, improving digestive flora balance and increasing animal performances.

Composition: formic acid, ammonium formate, acetic acid, propionic acid, cupric sulphate, sodium chloride, sucrose.

- **Dose:** 0.5 - 2ml/1000L water
- **Expiry date:** 18 months
- **Packaging:** 5L, 25L, 1000L

FITEC PLUS
Phytase produced by Aspergillus niger being effective in a large pH spectrum of the digestive tract.

Composition: 6-phytase EC 3.1.3.26, calcium carbonate.

- **Dose:** Layers= 0.06 - 0.08 %
- **Other species=** 0.1 - 0.14%
- **Expiry date:** 12 months
- **Packaging:** 25Kg
**ACITEC A-GR**

Microencapsulated essential oils and acids for poultry. It obtains a constant and safe acidification through the complete intestinal tract. It avoids hyperacidification and pathogenic bacteria.

**Composition:** fumaric acid, malic acid and essential oils with antibacterial and synergic properties.

- **Dose:** 0.02–0.075 %
- **Expiry date:** 18 months
- **Packaging:** 25Kg

**ACITEC C-GR**

Microencapsulated essential oils and acids for pigs. It obtains a constant and safe acidification through the complete intestinal tract. It avoids hyperacidification.

**Composition:** fumaric acid, sodium formate and essential oils with antibacterial properties.

- **Dose:** 0.025–0.15%
- **Expiry date:** 18 months
- **Packaging:** 25Kg

**VITAMIC**

Microencapsulated lipotropic factors for ruminants with liver dysfunctions. The microencapsulation provides protection against rumen degradation allowing the active substances to remain intact getting into intestine.

**Composition:** choline, methionin, nicotinic a, vitamin E, folic a.

- **Dose:** Dairy Sheep/Goats = 8 g/d
- **Dairy Cows** = 50 g/d
- **Expiry date:** 12 months
- **Packaging:** 5Kg, 25Kg
**ALITEC**

Allows a good start up of young animals, contributing to maintain high levels of growth in the fatteners of lambs, kids and calves.

**Composition:** microencapsulated essential oils with extracts of plants and spices.
- **Dose:** 0.2%
- **Expiry date:** 12 months
- **Packaging:** 1Kg, 5Kg, 25Kg

**HYDROCAP-AA**

Effective alternative to the use of growth promoters, avoiding the destruction of the saprophytic flora. It acidifies, having slow releasing effect all along the intestinal tract.

**Composition:** medium chain fatty acids esterified with glycerol, pure distilled fatty acids from splitting palm oil, aromatics substances.
- **Dose:** 0.20-0.5 ml/L drinking water
- **Expiry date:** 18 months
- **Packaging:** 1L, 5L

**HYDRACID-B**

Liquid blend of Butyric acid glycerides and preservatives. It favours the feed intake and it controls the microbiota of the digestive tract, avoiding the development of pathogenic bacteria. Hydracid-B may be use for swine, poultry and rabbits of all ages.

**Composition:** monoglycerides, dyglycerides and triglycerides of butyric acid, glycerine, propionic acid, ammonium propionate.
- **Dose:** 250 – 500 ml per 1000L of drinking water
- **Expiry date:** 12 months
- **Packaging:** 5L

**BUTYTEC**

Microencapsulated formula, it contributes to maintain a good status of the intestinal tract and better absorption of the nutriments in all animal species.

**Composition:** butyric acid from its calcium salt, fumaric acid.
- **Dose:** 0.03 - 0.1%
- **Expiry date:** 18 months
- **Packaging:** 20Kg
BUTYTEC PLUS

Microencapsulated formula, to achieve a good status of the intestinal tract and better absorption of the nutriments for all animal species. It contains essential oils with synergic effects.

Composition: butyric acid from its calcium salt, fumaric acid and aromatic substances.

- **Dose:** 0.03 - 0.1%
- **Expiry date:** 18 months
- **Packaging:** 20Kg
MICROENCAPSULATED PRODUCTS

- Effectiveness
- High technology
- Gradual release in the target place
- Protection against external factors: no loss
- Easier handling
- Economical benefit
Function: NUTRITIONAL COMPLEMENTS

APLOMOTEC PLUS
In fast-growing breeds to prevent abnormalities in the hoof state or any other symptoms associated with biotin deficiency.
Composition: biotin, zinc, manganese and copper of organic origin.
• Dose: 0.1%
• Expiry date: 12 months
• Packaging: 25Kg

SPLAY TEC
Supplement for gestating sows to use in farms with high incidence of splay leg in piglets.
Composition: vitamin E, selenium and other minerals.
• Dose: 0.2%
• Expiry date: 12 months
• Packaging: 25Kg

NVP003
For sows with higher requirements of vitamins to improve prolific parameters and fertility in reproduction periods.
Composition: vitamin E, folic acid, biotin.
• Dose: 0.1%
• Expiry date: 12 months
• Packaging: 5Kg
### REPROLAC RUMIANTES

Reinforces the health of ruminants during high production periods, having an action in rumen, liver, intestine and also in reproductive system.

**Composition:** yeast, amino acids, vitamins and minerals in organic form.

- **Dose:** 1%
- **Expiry date:** 12 months
- **Packaging:** 20Kg

---

### TECVIT AD3E

Specially designed for the treatment and prevention of deficiency processes that cause reproductive disorders or developmental defects.

**Composition:** Glycerol, vitamin A, vitamin D3, vitamin E.

- **Dose:** 0,25 - 1.5 ml/L drinking water
- **Expiry date:** 12 months
- **Packaging:** 1L, 5L

---

### TECVIT Se

Recommended for normal reproductive function, improving fertility and oestrus. It prevents encephalomalacia in poultry and muscular dystrophy in lambs and calves. In pigs it prevents mulberry heart disease and dietary hepatoses.

**Composition:** vitamin E, sodium selenite, potassium sorbate, polyethylene glycol glyceryl ricinoleate.

- **Dose:** 1ml/L drinking water
- **Expiry date:** 12 months
- **Packaging:** 1L, 5L

---

### TECVIT PLUS

Corrects health and productive risk situations in periods of imbalances and nutritional deficiencies. It also acts as a growth promoter and production enhancer.

**Composition:** vitamin A, D3, E, B1, B2, B6, B12, K3, panthenol, inositol, choline chloride.

- **Dose:** 0,5 - 2ml/L drinking water
- **Expiry date:** 12 months
- **Packaging:** 1L, 5L
TECPRO 60V

Concentrate of vegetable proteins for swine and poultry in any productive phase.

Composition: potato protein, soya protein concentrate, wheat gluten and roasted soybeans

- **Dose:** 3 –12% depending on protein requirements
- **Expiry date:** 12 months
- **Packaging:** 30Kg

TECVIT Se
Recommended for normal reproductive function, improving fertility and oestrus. It prevents encephalomalacia in poultry and muscular dystrophy in lambs and calves. In pigs it prevents mulberry heart disease and dietary hepatoses.

Composition: vitamin E, sodium selenite, potassium sorbate, polyethylene glycol glyceryl ricinoleate.

- **Dose**: 1ml/L drinking water
- **Expiry date**: 12 months
- **Packaging**: 1L, 5L

TECVIT PLUS
Corrects health and productive risk situations in periods of imbalances and nutritional deficiencies. It also acts as a growth promoter and production enhancer.

Composition: vitamin A, D3, E, B1, B2, B6, B12, K3, panthenol, inositol, choline chloride.

- **Dose**: 0.5 - 2ml/L drinking water
- **Expiry date**: 12 months
- **Packaging**: 1L, 5L

NOTES:
ACITEC LIQUIDO

Decreases the water pH, having several effects: compensation of gastric secretion in young animals, improving digestive flora balance and increasing animal performances.

Composition: formic acid, ammonium formate, acetic acid, propionic acid, cupric sulphate, sodium chloride, sucrose.

- **Dose**: 0.5 - 2ml/1000L water
- **Expiry date**: 18 months
- **Packaging**: 5L, 25L, 1000L.

PROFOR A

Preservative, antimicrobial and fungicide for raw materials and silage.

Composition: propionic acid, ammonium formate, formic acid.

- **Dose**: 0.05 - 0.2%
- **Expiry date**: 12 months
- **Packaging**: 25L
HIDROCAP-AA

To their health!

The complementary liquid feed

The effective alternative to growth promoters
Improving conversion rates

Natural acidifier with a gradual release along the intestinal tract.

Improves digestibility of the diet enhancing saprophytic flora.

TECNOLOGIA & VITAMINAS

T & V

Nutrición animal
HISTOVIT

Included in the feed, is a specific preventive treatment for histomoniasis: a parasitic disease of birds.

Composition: plants and essential oils with antiparasitic, antiseptic and stimulant properties.

- **Dose:** 0.085%
- **Expiry date:** 12 months
- **Packaging:** 20Kg

ACITEC A-GR

Microencapsulated essential oils and acids for poultry. It obtains a constant and safe acidification through the complete intestinal tract. It avoids hyperacidification and pathogenic bacteria.

Composition: fumaric acid, malic acid and essential oils with antibacterial and synergic properties.

- **Dose:** 0.02–0.075 %
- **Expiry date:** 18 months
- **Packaging:** 25Kg

APLOMOTEC PLUS

In fast-growing breeds to prevent abnormalities in the hoof state or any other symptoms associated with biotin deficiency.

Composition: biotin, zinc, manganese and copper of organic origin.

- **Dose:** 0.1%
- **Expiry date:** 12 months
- **Packaging:** 25Kg
FEEDING ANIMAL HEALTH

NUTRACEUTICAL SOLUTIONS

37 PAGE

1st EDITION
CATALOGUE

Form: POWDER

SPLAY TEC
Supplement for gestating sows to use in farms with high incidence of splay leg in piglets.

Composition: vitamin E, selenium and other minerals.

- Dose: 0.2%
- Expiry date: 12 months
- Packaging: 25Kg

25Kg

NVP003
For sows with higher requirements of vitamins to improve prolific parameters and fertility in reproduction periods.

Composition: vitamin E, folic acid, biotin.

- Dose: 0.1%
- Expiry date: 12 months
- Packaging: 5Kg

5Kg

ACITEC C-GR
Microencapsulated essential oils and acids for pigs. It obtains a constant and safe acidification through the complete intestinal tract. It avoids hyperacidification.

Composition: fumaric acid, sodium formate and essential oils with antibacterial properties.

- Dose: 0.025-0.15%
- Expiry date: 18 months
- Packaging: 25Kg

25Kg

REPROLAC RUMIANTES
Reinforces the health of ruminants during high production periods, having an action in rumen, liver, intestine and also in reproductive system.

Composition: yeast, amino acids, vitamins and minerals in organic form.

- Dose: 1%
- Expiry date: 12 months
- Packaging: 20Kg

20Kg

GLUKOSE

Dietetic product used to reduce the risk of ketosis in dairy ruminants.

Composition: based on the ingredients that provide energy from glycogen.

- **Dose:** sheep/goats = 40g/d
- **Cows:** 250-300g/d
- **Expiry date:** 12 months
- **Packaging:** 5Kg, 20Kg

HYDRATEC

Dietetic supplement for rehydration. It is recommended for ruminants in prevention and treatment of diarrheal enteric disorders and/or recovery.

Composition: Sucrose, skimmed milk powder, whey powder, sodium chloride, palm oil, wheat flour, potassium chloride, potassium sulphate, yeast their similar products and vitamins.

- **Dose:** 180g/2L of drinking water
- **Expiry date:** 12 months
- **Packaging:** 180g

CALCIOVIT

Supplementary diet feed for dairy cows aimed at reducing the risk of milk fever.

Composition: highly available calcium salt, full contribution of electrolytes, plant extract stimulating the appetite having choleretic, cholagoge effects.

- **Dose:** 1 bag of 500g/25L of water
- **Expiry date:** 12 months
- **Packaging:** 500g

HEPATOVIT

Reduces the risk of fatty liver syndrome. It’s used in fatty cows in early lactation, in highly potential cows at the peak of lactation and early dry period for all livestock. It helps to maintain a good milk production.

Composition: vitamin A, choline, betaine, trace elements and plant extract having effects on liver cells regeneration.

- **Dose:** Sheep/Goats = 20 g/d
- **Cows:** = 100 g/d
- **Expiry date:** 12 months
- **Packaging:** 500g
**VITAMIC**

Microencapsulated lipotropic factors for ruminants with liver dysfunctions. The microencapsulation provides protection against rumen degradation allowing the active substances to remain intact getting into intestine.

**Composition:** choline, methionin, nicotinic a, vitamin E, folic a.

- **Dose:** Dairy Sheep/Goats = 8 g/d  
- **Dairy Cows** = 50 g/d  
- **Expiry date:** 12 months  
- **Packaging:** 5kg, 25kg

**ALITEC**

Allows a good start up of young animals, contributing to maintain high levels of growth in the fatteners of lambs, kids and calves.

**Composition:** microencapsulated essential oils with extracts of plants and spices.

- **Dose:** 0.2%  
- **Expiry date:** 12 months  
- **Packaging:** 1Kg, 5Kg, 25Kg

**BUTYTEC**

Microencapsulated formula, to achieve a good status of the intestinal tract and better absorption of the nutriments for all animal species. It contains essential oils with synergic effects.

**Composition:** butyric acid from its calcium salt, fumaric acid.

- **Dose:** 0.03 - 0.1%  
- **Expiry date:** 18 months  
- **Packaging:** 20Kg

**BUTYTEC PLUS**

Microencapsulated formula, to achieve a good status of the intestinal tract and better absorption of the nutriments for all animal species. It contains essential oils with synergic effects.

**Composition:** butyric acid from its calcium salt, fumaric acid and aromatic substances.

- **Dose:** 0.03 - 0.1%  
- **Expiry date:** 18 months  
- **Packaging:** 20Kg
**PIDOVIT**

Nutritional complex especially developed for pigs and poultry, due to its composition containing an analogue of P5C, it improves bone structure and the eggshell becomes harder.

**Composition:** Calcium Pidolate, 25-hydroxycholecalciferol, sepiolite and magnesium oxide.

- **Dose:** 0.15 - 0.2%
- **Expiry date:** 12 months
- **Packaging:** 25Kg

---

**PROHEPA**

For all animals species to prevent and treat liver dysfunctions, improving metabolism of fats and recovering liver overload.

**Composition:** choline, betaine, nicotinic ac., methionine, sorbitol and trace elements: Se and Zn in different forms.

- **Dose:** 0.4 - 0.6%
- **Expiry date:** 12 months
- **Packaging:** 20Kg

---

**TECPRO 60V**

Concentrate of vegetable proteins for swine and poultry in any productive phase.

**Composition:** potato protein, soya protein concentrate, wheat gluten and roasted soybeans

- **Dose:** 3 –12% depending on protein requirements
- **Expiry date:** 12 months
- **Packaging:** 30Kg

---

**ACITEC**

Provides a strong and safe acidification, compensating the gastric secretion in young animals. It improves digestive flora balance and it avoids pathogenic bacteria increasing performances.

**Composition:** citric acid, ortophosphoric acid, lactic acid, fumaric acid, , propionic acid, acetic acid, silicic acid, sepiolite.

- **Dose:** 0.1 - 0.5%
- **Expiry date:** 12 months
- **Packaging:** 25Kg
**FITEC PLUS**
Phytase produced by Aspergillus niger being effective in a large pH spectrum of the digestive tract.

**Composition:** 6-phytase EC 3.1.3.26, calcium carbonate.
- **Dose:** Layers = 0.06 - 0.08 %
- **Other species =** 0.1 - 0.14%
- **Expiry date:** 12 months
- **Packaging:** 25Kg

**AMOPROP**
Preservative, antimicrobial and fungicide for raw materials.

**Composition:** synergic blend of propionic acid and ammonium propionate.
- **Dose:** 0.005 - 0.2%
- **Expiry date:** 12 months
- **Packaging:** 25Kg

**MICOCID**
Mycotoxins are secondary metabolites produced by microscopic fungi which have negative effects in animal performances. Micocid is a binder of mycotoxins, it stimulates the immune system and has antioxidants effects.

**Composition:** clinoptilolite, bentonite, sepiolite, *Silybum marianum* seeds, manno-oligosaccharides (MOS) and *B*-glucans.
- **Dose:** 0.05 - 0.2%
- **Expiry date:** 12 months
- **Packaging:** 20Kg
